

Put Yourself in the Driver's Seat

Do you want to improve your financial know-how and learn valuable skills to manage your money through to retirement, or take that crucial step to putting in place a share investment plan that will help you with a deposit for your first home or establish an additional income stream ?

You might be quite surprised to learn that you actually don't need large sums of money to get started and the team at iInvest, who are prominently women and understand the need to care for your family, improve your life and find security, can tailor a plan that fits your lifestyle perfectly.

Not that different from opening a bank account, you can start with a minimal amount and add to it in the same manner as you would to a bank account.

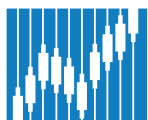

Our costs are competitive and you only get charged for what you buy or sell, and we don't charge the ongoing management fees that many other advisers do.

If you'd like to learn more, call us today or book into one of our information evenings.
